

# Workshop: Privacy is Personal

## Personal Threat Modeling

- What personal information do I want to protect?
  
- What information am I happy to make completely public?
  
- Who do I want to protect it from? Who might be interested in my information?
  
- What are the potential consequences if this information is distributed?
  
- How likely is the information to be collected or breached?
  
- How much effort am I willing to expend to keep this information private?

## **Privacy Audit**

Visit [katherinedruckman.com/privacy](https://katherinedruckman.com/privacy) for links.

- Search your name in quotes. (It's a good idea to set up Google alerts for this information as well.)
- Search your home address and your phone number.
- Look up your home address at <https://clustrmaps.com/>.
- Look up your name on Intellius or Spokeo.
- Visit <https://myactivity.google.com/myactivity> to see stored Google account activity.
- Visit <https://maps.google.com/locationhistory> to see Google location history.
- Visit [https://www.facebook.com/your\\_information](https://www.facebook.com/your_information) to see your stored Facebook activity.

## **Evaluate Your Tech**

Search some of your most-used products or Apps at <https://foundation.mozilla.org/en/privacynotincluded/>

Visit <https://tosdr.org/> and look up some apps and sites you use.

- Evaluate the security and privacy risks and reference your notes from the threat modeling exercise.
